

Jason International

www.jasoninternational.com

CORPORATE

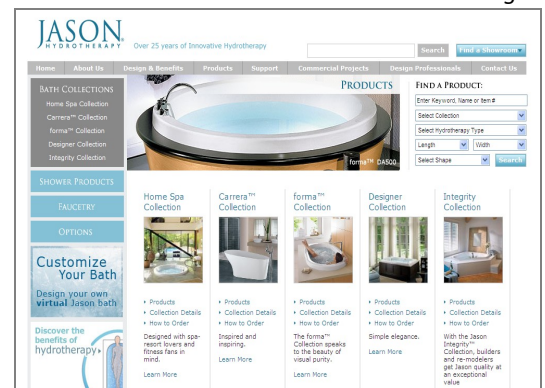

Jason International, founded by Remo Jacuzzi, is a leading manufacturer of hydrotherapy bath products. The manufacturer recently turned to Americaneagle.com to redesign their site with a fresh, stylistic, and brand-complimentary approach. With the design of a new navigation system, users are now able to quickly and easily navigate through the content-rich site.

Additionally, the online showroom was uniquely designed with features that enable visitors to take a closer look at the Jason International collections and products. Indeed, dynamic tools such as mouse-over technology and alternative images emphasize the beauty and luxury of their products and encourage purchases.

features
