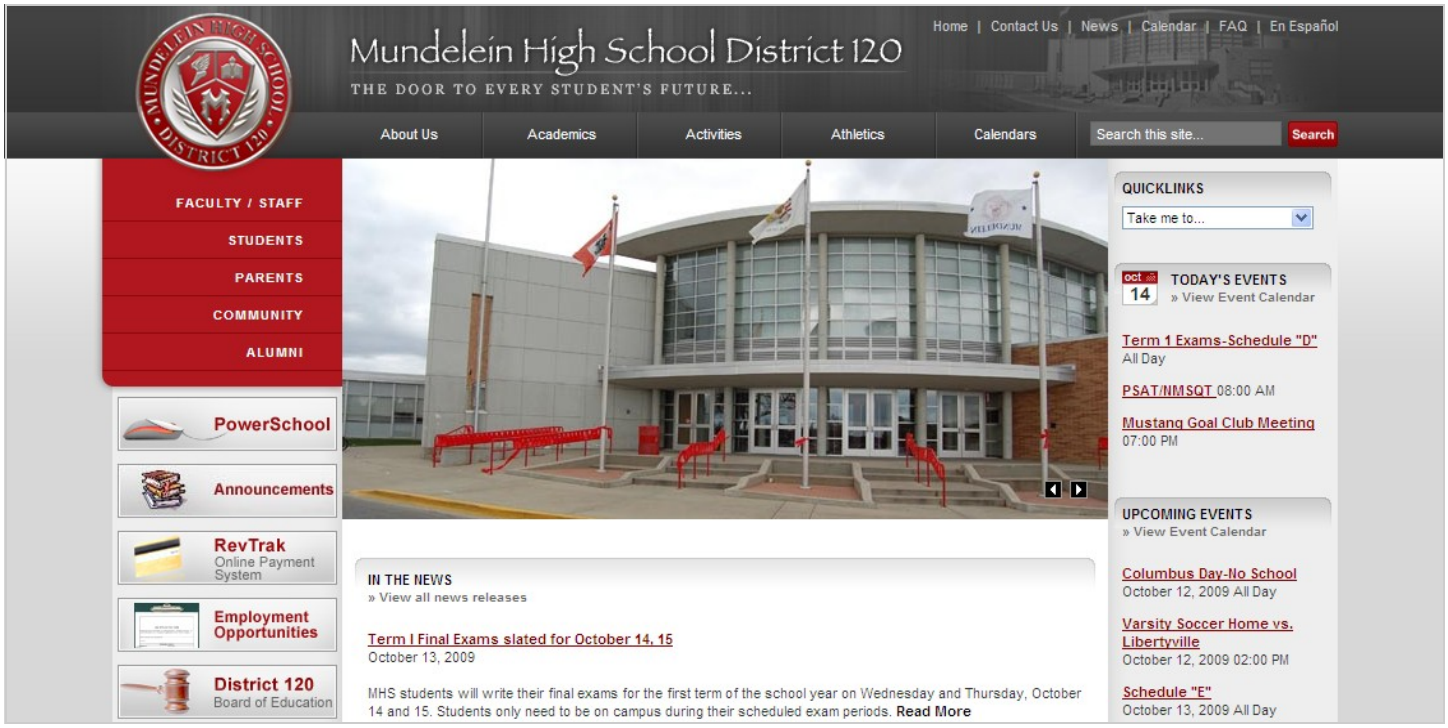
Mundelein H.S. District 120 | www.d120.org SCHOOL



The Mundelein High School District came in contact with Americaneagle.com in early 2009 with several goals.. The district was looking for a design that would accurately reflect their professional and academic strength as well as portray the theme of diversity. The district was also looking for flexibility; they needed the site to have the potential to grow with new content, functionalities, and enhancements. In order to meet these goals, Americaneagle.com built the district site upon the foundation of the unique idev® platform, but also customized specifically to fit Mundelein High School's needs. The new site features many of the newest technologies available to schools and, most importantly, features a robust content management system which empowers non-technical staff to make edits to the site on their own, and on the fly.
