

Member Portal Homepage

The Warehousing Education and Research Council (WERC) is the only professional organization focused on warehouse management and its role in the supply chain. They recently contacted Americaneagle.com to create a high quality website for people using WERC products or services. The site needed to support the professional development of WERC members and the logistics community at large by providing easy access to WERC learning experiences, networking opportunities, and industry information. The redevelopment of the site included a new CMS, iMIS Integration, Integration with selected 3rd party applications, enhanced navigation and usability, an enhanced online shopping experience, improved “findability” of desired information, improved performance and speed, and a search engine friendly design.
